

Doris Walser

Doris Walser, Artist

«Painting and three-dimensional works to me is an adventure among other things; it enables me to enter undiscovered realms.»

Portrait

Doris Walser consistently goes her own way with her personal and artistic language of imagery. The expressive powers of the subconscious, a «gift of coincidence» as she calls it, challenge Doris to conscious creativity. Here lies Doris' mastery. Following a diverse educational curriculum in Art, Doris Walser had her first exhibition in 1973. An intensive artistic career accompanied by the many courses she gives enable her to pass on this immense knowledge and this life fulfills her entirely. She is at home with the many painting techniques - she paints scenery, still life, human beings, flowers in aquarelle, mixed techniques or acrylic.
